

Roma³[™]

electroceutical[™] therapy system

Ivivi Technologies is proud to offer the Roma³. The Roma³ is a non-invasive pulsed electromagnetic field (PEMF) device which is FDA-cleared for the treatment of pain and edema in soft tissue. CMS has issued a National Coverage Determination for the use of PEMF with chronic wounds.

- Two pounds
- AC power
- Unlimited number of treatments
- Single patient use or carry from patient to patient
- Treats up to three sites simultaneously
- No daily disposables, one set of 6" or 8" therapy applicators last 30+ days
- Manual Start button.
Shuts off automatically.

Features:

- Ivivi makes electrotherapy easy to use by anyone
 - Simple, easy to use, affordable therapy
 - Treats directly through dressings, clothing, casts, compression garments, etc.
 - Lightweight, conformable applicators easy to position and affix for therapy
 - Point and shoot operation
- Requires no special preparation of treatment site
- No known side-effects
- Non-pharmaceutical, non-invasive

Benefits:

- Virtually labor-free
- Easy to administer
- Compatible with other adjunctive therapies
- Single unit can service multiple patients
- Painless therapy for patients
- No electrical interference

Outcomes:

- Electrotherapy outcomes are widely documented as effective
- Over 650,000 treatments
- No known side-effects
- Cost reductions:
 - No specialized staff required
 - No daily disposables

Ivivi Technologies is a medical technology company devoted to delivering the finest, most efficacious electrotherapies to clinical care in highly flexible forms that can be readily integrated into any clinical protocol. The team at Ivivi conducts ongoing basic science research to better target specific physiological processes with more sophisticated signals. Clinical feedback

from dedicated clinicians is incorporated into the design process, ensuring that the technologies from Ivivi are easily used in everyday clinical practice. From the mechanism of action to the bedside, Ivivi Technologies is creating a new standard of care that offers safe, effective, non-invasive targeted electrotherapy.
